Why learn music at MSS?

Students of the arts learn to think creatively and to solve problems by imagining various solutions. Through music study, students learn the value of sustained effort to achieve excellence.

Music enhances teamwork skills and discipline.

Musicians work together harmoniously towards goals of learning, practicing, and performing music!

Music spills into other subjects and is cross curricular. Learning and participating in music will enhance your child's overall education and improve test scores across the board!

Teacher: Ms. Simondet
Director: Mr. Kose

Our Goal

Student achievement

I am committed to the academic and personal development of all students through child-centered and learning focused curriculum.

Welcome to the Minnesota School of Science! I am looking forward to the 2011-2012 academic school year. I graduated from the University of Minnesota-Duluth and received my teaching qualification in instrumental music-education. From January 2008 to June 2011 I taught in the Czech Republic at the Prague British School. I have experience teaching children from around the world and I am so excited to be teaching music in Minnesota!
